

FNP Sales Analysis Dashboard – Project Report

Project Overview

The FNP Sales Analysis Dashboard is an interactive business intelligence dashboard created using Microsoft Excel. The dashboard helps analyze sales performance, customer spending behavior, delivery timelines, product performance, and city-wise order trends through visual insights and KPI tracking.

Tools & Technologies Used Microsoft Excel Pivot Tables & Pivot Charts Power Query Slicers & Interactive Filters Data Visualization Techniques

KPI	Value
Total Orders	1000
Total Revenue	■₹35,20,984
Average Customer Spending	■₹3,520.98
Avg Delivery Time	5.53 Days

Key Dashboard Insights Anniversary and Raksha Bandhan occasions generated the highest revenue. Colors and Soft Toys categories contributed the most to total sales. Evening hours showed peak customer ordering activity. February and August recorded strong seasonal sales growth. Top-performing products included Magnam Set and Quia Gift. Imphal, Dhanbad, and Kavali were among the top cities by orders.

Business Impact

This dashboard enables businesses to monitor sales trends, identify high-performing products and regions, analyze customer behavior, and improve decision-making using data-driven insights.

Conclusion

The FNP Sales Analysis Dashboard converts raw sales data into meaningful visual insights. It provides an efficient and interactive solution for sales monitoring, business analysis, and strategic planning.
